### **Background and Work Experience**

I was born in Eskişehir in 1969, I completed the primary, then I finish engine vocational high school in Eskişehir, I passed the Air Force Petty Officer exams held by the Air Force in 1988 and graduated in 1989 as a jet engine technician. Later, I worked as a jet engine technician, quality control and workshop chief at Flight lines and engine workshops in various units and aircraft of the Air Force. I graduated from Anadolu University 4-year Faculty of Business Administration.

In 2007, I was appointed by the Air Force as a teacher to the Air Technical Schools Command Aircraft Maintenance School as a Jet engine teacher and I had a training and assessment course for teaching. Afterwards, I worked as a teacher of courses on both theoretical and theoretical courses in Jet engine specialization courses, Flight Aerodynamics, Maintenance Applications and various aircraft types. I taught to the class about practice lessons.

I retired voluntarily in 2015, I am I working as a Teacher of Aircraft Maintenance Field in HAVAJET Vocational Technical Anatolian High School and I have begun work at ege university since 2015 too as a lecturer at Ege University Aviation Vocational School Aircraft Technologies department, I have been teaching Gas turbine engines, Piston engines, Propeller, Propulsion systems courses both theoretically. I have textbooks compiled from various sources of gas turbine engines and systems, propulsion systems, propeller lessons.

Fishing, doing research on aviation and watching documentaries are among my special pleasures.
